5. I didn't see a ship to listed in the documentation can you provide that? Additionally, is there a dock on this facility? Would any inside delivery be required? This is going to be a very heavy order so just want to be sure we are not missing anything.

**Product should be shipped to 404 Elm St. Rockford IL 61101. Our facilities department has a forklift and can unload the pallets and move into our garage.**

6. I have a question about the Eaton 5P UPS 1440VA 1100W 120V 1U Rackmount Lithium-Ion Net Card Optional Mfg # 5P1500R-L. From what I can see, the only minor gap I have with what I am looking to offer has a slight difference in power capacity (1440 VA instead of 1500 VA), but matches the manufacture number. I don't believe this is will impact to typical applications but I just wanted to be sure before we proceed with mailing in a proposal. If precise power capacity is crucial, please let me know and we will work to ensure compliance.

**The 1440VA would be fine.**
